VOLUME 34, PART II

SUBJECT INDEX

A

Absorption.

Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.

Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.

Aggregates.

A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.

Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

Aging.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

The Testing of Raw Materials for Rubber Compounds. B. S. Taylor, 647.

Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.

Alloys.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

The Impact Strength of Commercial Zinc Alloy Die Castings. E. A. Anderson and G. L. Werley, 176.

Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

Alloy Steel.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

Aluminum.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

Some Factors Affecting Strain Measurements in Tests of Metals. R. L. Templin, 182. Discussion, 195.

Apparatus.

See **Testing Apparatus.**

Asphalt.

Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.

Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.

A

Absorption.

Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.

Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.

Aggregates.

A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.

Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

Aging.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

The Testing of Raw Materials for Rubber Compounds. B. S. Taylor, 647.

Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.

Alloys.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

The Impact Strength of Commercial Zinc Alloy Die Castings. E. A. Anderson and G. L. Werley, 176.

Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

Alloy Steel.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

Aluminum.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

Some Factors Affecting Strain Measurements in Tests of Metals. R. L. Templin, 182. Discussion, 195.

Apparatus.

See **Testing Apparatus.**

Asphalt.

Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.

Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.

B

Bituminous Materials.
Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.
A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.
Blue Brittleness.
Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.
Boiler Water.
Water as an Engineering and Industrial Material. Edgar Marburg Lecture. Sheppard T. Powell, 3.
Bond.
Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.
Resultant Separation Cracking Between Various Mortars and Brick in Existing Brick Structures. C. C. Connor, 454. Discussion, 471.
Brass.
A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G. N. Krouse, 156. Discussion, 161.
Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.
Brick.
The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.
Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.
Resultant Separation Cracking Between Various Mortars and Brick in Existing Brick Structures. C. C. Connor, 454. Discussion, 471.
Tests on Reinforced Brick Masonry Columns. M. O. Withey, 387. Discussion, 404.
Brinell Hardness.
See **Hardness Testing.**

C

Calibration.
Characteristics of the Huggenberger Tensometer. R. W. Vose, 862. Discussion, 874.
Calorimeter.
The Vane Calorimeter. R. W. Carlson, 322.
Castings.
The Impact Strength of Commercial Zinc Alloy Die Castings. E. A. Anderson and G. L. Werley, 176.
Cast Iron.
A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G. N. Krouse, 156. Discussion, 161.
Caustic Embrittlement.
See **Embrittlement.**
Celite.
Materials for Use in Structural Engineering Models, with Special Reference to Rubber Compounds. A. V. Karpov, 663. Discussion, 680.

Cement.
Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.
Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.
A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.
The Vane Calorimeter. R. W. Carlson, 322.

Ceramics.
The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.

Chromium Steel.
See **Alloy Steel.**

Clay.
The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.
The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.
Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.

Colloids.
The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.
Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.

Combustibility.
Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Compression Testing.
Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.
Proposed Method of Making Compression Tests on Portions of Concrete Beams from Flexure Tests. L. H. Koenitzer, 406. Discussion, 414.
Some Factors Affecting Strain Measurements in Tests of Metals. R. L. Templin, 182. Discussion, 195.
Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.
Tests on Reinforced Brick Masonry Columns. M. O. Withey, 387. Discussion, 404.
The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

Concrete.
Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.
Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.
Proposed Method of Making Compression Tests on Portions of Concrete Beams from Flexure Tests. L. H. Koenitzer, 406. Discussion, 414.

Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.

Corrosion.

The Determination of Traces of Dissolved Oxygen by the Winkler Method. M. C. Schwartz and W. B. Gurney, 796. Discussion, 813.

Observations on Effect of Surface Finish on the Initial Corrosion of Steel Under Water. L. J. Waldron and E. C. Groesbeck, 123. Discussion, 132.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

The Use of Bureau of Standards Soil Corrosion Data in the Design and Protection of Pipe Lines. K. H. Logan, 138. Discussion, 153.

Creep Tests.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

The Interpretation of Creep Tests. P. G. McVetty, 105. Discussion, 117.

Crib Test.

Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Curing.

Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.

Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

D

Dams.

The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.

Materials for Use in Structural Engineering Models, with Special Reference to Rubber Compounds. A. V. Karpov, 663. Discussion, 680.

Data, Analysis of.

See **Statistical Analysis.**

De-Airing.

The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.

Die Castings.

The Impact Strength of Commercial Zinc Alloy Die Castings. E. A. Anderson and G. L. Werley, 176.

Dielectric Constant.

A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.

E

Elasticity.

See **Tension Testing.**

Electrical Testing.

A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.

Elutriation.
The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.

Embrittlement.
Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.
Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.
Water as an Engineering and Industrial Material. Edgar Marburg Lecture. Sheppard T. Powell, 3.

Endurance Testing.
See **Fatigue.**

Engineering Models.
Materials for Use in Structural Engineering Models, with Special Reference to Rubber Compounds. A. V. Karpov, 663. Discussion, 680.

Exposure Tests.
See **Corrosion; Weathering.**

Extensometers.
The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

F

Fatigue.
A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G. N. Krouse, 156. Discussion, 161.

Fineness.
See **Particle Size.**

Fire Resistance.
Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Fire Tests.
Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Flexure Testing.
Proposed Method of Making Compression Tests on Portions of Concrete Beams from Flexure Tests. L. H. Koenitzer, 406. Discussion, 414.

Flow.
Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

Freezing-and-Thawing Tests.
Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.
Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.

Frictional Resistance.
Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.

G

Gasoline.
Motor Fuels and Vapor Lock. George Granger Brown, 550. Discussion, 560.
Motors and Fuel Vapor Pressure. T. A. Boyd, 540. Discussion, 560.

H

Hardness Testing.
Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.
Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.
Effect of Thickness on the Accuracy of Rockwell Hardness Tests on Thin Sheets. R. L. Kenyon, 229. Discussion, 239.
Heat of Hydration.
The Vane Calorimeter. R. W. Carlson, 322.
High Temperature Testing.
See **Temperature, Effect of.**

I

Immersion Tests.
Observations on Effect of Surface Finish on the Initial Corrosion of Steel Under Water. L. J. Waldron and E. C. Groesbeck, 123. Discussion, 132.
Impact Testing.
Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.
Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.
The Impact Strength of Commercial Zinc Alloy Die Castings. E. A. Anderson and G. L. Werley, 176.
Indentation Test.
Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.
Instruments.
See **Testing Apparatus.**
Insulating Materials.
A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.
Interpretation of Data.
The Interpretation of Creep Tests. P. G. McVetty, 105. Discussion, 117.
Iron.
Observations on Effect of Surface Finish on the Initial Corrosion of Steel Under Water. L. J. Waldron and E. C. Groesbeck, 123. Discussion, 132.
Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.
The Use of Bureau of Standards Soil Corrosion Data in the Design and Protection of Pipe Lines. K. H. Logan, 138. Discussion, 153.

J

Jointing Compounds.
Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.

M

Masonry.
Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.
Resultant Separation Cracking Between Various Mortars and Brick in Existing Brick Structures. C. C. Connor, 454. Discussion, 471.
Tests on Reinforced Brick Masonry Columns. M. O. Withey, 387. Discussion, 404.
Mass Tone.
A Discussion of the Accuracy and Utility of Methods of Test for Mass Tone and Tinting Strength of Dry Colors. J. W. Ayers, 497. Discussion, 509.
Metallic Coatings.
See **Corrosion.**
Metallurgy.
Application of Statistical Methods to the Solution of Metallurgical Problems in the Steel Plant. W. C. Chancellor, 891. Discussion, 910.
Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.
Models.
Materials for Use in Structural Engineering Models, with Special Reference to Rubber Compounds. A. V. Karpov, 663. Discussion, 680.
Modulus of Elasticity.
See **Tension Testing.**
Moisture Content.
Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.
Molybdenum Steel.
See **Alloy Steel.**
Mortar.
Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.
Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.
Resultant Separation Cracking Between Various Mortars and Brick in Existing Brick Structures. C. C. Connor, 454. Discussion, 471.
Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.

N

Notches, Effect of.
Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

O

Oil Resistance.
The Testing of Rubber and Rubber-Like Materials for Oil Resistance. O. M. Hayden, 635. Discussion, 644.
Oxygen Determination.
The Determination of Traces of Dissolved Oxygen by the Winkler Method. M. C. Schwartz and W. B. Gurney, 796. Discussion, 813.

P

Paint.
Method and Apparatus for Determining the Interval Required to Disperse Oil Colors Throughout a Paint Medium. M. Rea Paul and George Diehlman, 490. Discussion, 496.

Particle Size.
The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.
A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.

Paving Materials.
A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.

Permeability.
Permeability Tests of 8-in. Brick Wallettes. L. A. Palmer and D. A. Parsons, 419. Discussion, 432.

Petroleum Products.
Motor Fuels and Vapor Lock. George Granger Brown, 550. Discussion, 560.
Motors and Fuel Vapor Pressure. T. A. Boyd, 540. Discussion, 560.

Photoelastic Testing.
Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

Pigments.
A Discussion of the Accuracy and Utility of Methods of Test for Mass Tone and Tinting Strength of Dry Colors. J. W. Ayers, 497. Discussion, 509.
Method and Apparatus for Determining the Interval Required to Disperse Oil Colors Throughout a Paint Medium. M. Rea Paul and George Diehlman, 490. Discussion, 496.
The Testing of Raw Materials for Rubber Compounds. B. S. Taylor, 647.
Tinting Strength of White Pigments. R. H. Sawyer, 515. Discussion, 531.
Tinting Strength of White Pigments. G. F. A. Stutz, 521. Discussion, 531.

Pipe.
Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.
The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.
The Use of Bureau of Standards Soil Corrosion Data in the Design and Protection of Pipe Lines. K. H. Logan, 138. Discussion, 153.

Plasticity.
Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.
Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

Portland Cement.
See **Cement.**

Power Factor.
A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.

Presentation of Data.
See **Statistical Analysis.**

Protective Coatings.
See **Corrosion; Paint.**

R

Reinforced Brick Masonry.
Tests on Reinforced Brick Masonry Columns. M. O. Withey, 387. Discussion, 404.
Road Materials.
See **Paving Materials.**
Rockwell Hardness.
See **Hardness Testing.**
Rubber.
Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.
Materials for Use in Structural Engineering Models, with Special Reference to Rubber Compounds. A. V. Karpov, 663. Discussion, 680.
The Testing of Raw Materials for Rubber Compounds. B. S. Taylor, 647.
The Testing of Rubber and Rubber-Like Materials for Oil Resistance. O. M. Hayden, 635. Discussion, 644.

S

Sand.
Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.
Seizing.
Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.
Sewer Pipe.
Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.
Shaving Test.
Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.
Sheets.
Effect of Thickness on the Accuracy of Rockwell Hardness Tests on Thin Sheets. R. L. Kenyon, 229. Discussion, 239.
Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.
Shrink Fits.
Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.
Silt.
Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.
Slip.
Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.
Soil Corrosion.
The Use of Bureau of Standards Soil Corrosion Data in the Design and Protection of Pipe Lines. K. H. Logan, 138. Discussion, 153.

Soils.

Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.

Specifications.

Acceptance-Rejection Requirements in Specifications. H. F. Dodge, 877. Discussion, 910.

Application of Statistical Methods to the Solution of Metallurgical Problems in the Steel Plant. W. C. Chancellor, 891. Discussion, 910.

Spectrographic Analysis.

Water as an Engineering and Industrial Material. Edgar Marburg Lecture. Sheppard T. Powell, 3.

Statistical Analysis.

Acceptance-Rejection Requirements in Specifications. H. F. Dodge, 877. Discussion, 910.

Application of Statistical Methods to the Solution of Metallurgical Problems in the Steel Plant. W. C. Chancellor, 891. Discussion, 910.

Steel.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Application of Statistical Methods to the Solution of Metallurgical Problems in the Steel Plant. W. C. Chancellor, 891. Discussion, 910.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

Effect of Size and Shape of Test Specimen upon the Observed Physical Properties of Structural Steel. Inge Lyse and C. C. Keyser, 202. Discussion, 211.

Effect of Thickness on the Accuracy of Rockwell Hardness Tests on Thin Sheets. R. L. Kenyon, 229. Discussion, 239.

A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G. N. Krouse, 156. Discussion, 161.

The Interpretation of C eep Tests. P. G. McVetty, 105. Discussion, 117.

Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.

Observations on Effect of Surface Finish on the Initial Corrosion of Steel Under Water. L. J. Waldron and E. C. Groesbeck, 123. Discussion, 132.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

The Use of Bureau of Standards Soil Corrosion Data in the Design and Protection of Pipe Lines. K. H. Logan, 138. Discussion, 153.

Strain Measurements.

See **Testing, Methods of.**

Sulfate Water, Effect of.

Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.

Surface Determination.

A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.

T

Temperature, Effect of.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

The Interpretation of Creep Tests. P. G. McVetty, 105. Discussion, 117.

Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.

Tension Testing.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

Effect of Size and Shape of Test Specimen upon the Observed Physical Properties of Structural Steel. Inge Lyse and C. C. Keyser, 202. Discussion, 211.

Some Factors Affecting Strain Measurements in Tests of Metals. R. L. Templin, 182. Discussion, 195.

Study of Cement Composition in Relation to Strength, Length Changes, Resistance to Sulfate Waters and to Freezing and Thawing, of Mortars and Concrete. H. F. Gonnerman, 244. Discussion, 296.

The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

Tensometer.

Characteristics of the Huggenberger Tensometer. R. W Vose, 862. Discussion, 874.

Testing Apparatus.

Characteristics of the Huggenberger Tensometer. R. W. Vose, 862. Discussion, 874.

A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.

A Discussion of the Accuracy and Utility of Methods of Test for Mass Tone and Tinting Strength of Dry Colors. J. W. Ayers, 497. Discussion, 509.

Discussion on Subgrade Soil Testing Methods, 726.

A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G. N. Krouse, 156. Discussion, 161.

The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.

Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.

A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.

Method and Apparatus for Determining the Interval Required to Disperse Oil Colors Throughout a Paint Medium. M. Rea Paul and George Diehlman, 490. Discussion, 496.

A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.

Testing Sheets for Blue Brittleness and Stability Against Changes Due to Aging. R. L. Kenyon and R. S. Burns, 48.

The Vane Calorimeter. R. W. Carlson, 322.

The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

Testing, Methods of.

A Comparison of the Methods for Testing Insulating Materials for Power Factor and Dielectric Constant at 1000 Cycles. W. B. Kouwenhoven and L. W. Marks, 821. Discussion, 840.

A Discussion of the Accuracy and Utility of Methods of Test for Mass Tone and Tinting Strength of Dry Colors. J. W. Ayers, 497. Discussion, 509.

A High-Speed Fatigue Testing Machine and Some Tests of Speed Effect on Endurance Limit. G N. Krouse, 156. Discussion, 161.

The Importance and the Determination of Particle Sizes of Hydraulic-Fill Dam Materials. H. H. Hatch, 739. Discussion, 748.

Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.

A Laboratory Service Test for Pavement Materials. A. T. Goldbeck, J. E. Gray and L. L. Ludlow, Jr., 608. Discussion, 627.

Method and Apparatus for Determining the Interval Required to Disperse Oil Colors Throughout a Paint Medium. M. Rea Paul and George Diehlman, 490. Discussion, 496

Proposed Method of Making Compression Tests on Portions of Concrete Beams from Flexure Tests. L. H. Koenitzer, 406. Discussion, 414.

Some Factors Affecting Strain Measurements in Tests of Metals. R. L. Templin, 182. Discussion, 195.

Subgrade Soil Testing Methods. C. A. Hogentogler and E. A. Willis, 693. Discussion, 726.

A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.

Tinting Strength of White Pigments. R. H. Sawyer, 515. Discussion, 531.

Tinting Strength of White Pigments. G. F. A Stutz, 521. Discussion, 531.

The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

Test Specimen.

Concerning the Effect of Notches and Laws of Similitude in Material Testing. A. Nadai and C. W. MacGregor, 216.

Effect of Size and Shape of Test Specimen upon the Observed Physical Properties of Structural Steel. Inge Lyse and C. C. Keyser, 202. Discussion, 211.

Effect of Thickness on the Accuracy of Rockwell Hardness Tests on Thin Sheets. R. L. Kenyon, 229. Discussion, 239.

Note on Frictional Resistance of Steel and Brass in Shrink Fits. W. H. Swanger, 165. Discussion, 172.

Proposed Method of Making Compression Tests on Portions of Concrete Beams from Flexure Tests. L. H. Koenitzer, 406. Discussion, 414.

Tile.

The Effect of De-Airing Dry-Press and Stiff-Mud Bodies for Clay Products Manufacture. W. C. Rueckel and R. B. Keplinger, 480. Discussion, 489.

Indentation of Asphalt Tile. J. W. McBurney, 591. Discussion, 604.

Timber.

Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Tinting Strength.

A Discussion of the Accuracy and Utility of Methods of Test for Mass Tone and Tinting Strength of Dry Colors. J. W. Ayers, 497. Discussion, 509.

Tinting Strength of White Pigments. R. H. Sawyer, 515. Discussion, 531.

Tinting Strength of White Pigments. G. F. A. Stutz, 521. Discussion, 531.

Tubes.

Aging Embrittlement of 4 to 6 per cent Chromium Steel. H. M. Wilten and E. S. Dixon, 59. Discussion, 79.

Creep Properties of 5 per cent Chromium, 0.50 per cent Molybdenum Steel Still Tubes. H. C. Cross and E. R. Johnson, 80. Discussion, 101.

Turbidimeter.

A Suspension Turbidimeter for Determination of Specific Surface of Granular Materials. Alexander Klein, 303. Discussion, 315.

V

Vapor Lock.

Motor Fuels and Vapor Lock. George Granger Brown, 550. Discussion, 560.

Motors and Fuel Vapor Pressure. T. A. Boyd, 540. Discussion, 560.

Veneer.

Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.

Vibration.

The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.

Volume Change.

Effect of Duration of Moist Curing on the Principal Properties of Concrete. A. G. Timms, 329. Discussion, 343.

Plastic Flow of Concrete Under Sustained Stress. R. E. Davis, H. E. Davis and J. S. Hamilton, 354.

W

Wallettes.

Permeability Tests of 8-in. Brick Wallettes. L. W. Palmer and D. A. Parsons, 419. Discussion, 432.

Washington Regional Meeting.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

Water.

The Determination of Traces of Dissolved Oxygen by the Winkler Method. M. C. Schwartz and W. B. Gurney, 796. Discussion, 813.

Water as an Engineering and Industrial Material. Edgar Marburg Lecture. Sheppard T. Powell, 3.

Waterproofing.

Bituminous Joint Compounds for Sewer Pipe. J. S. Crandell, 581. Discussion, 587.

Weathering.

Summary of Proceedings of the Washington Regional Meeting—Symposium on the Outdoor Weathering of Metals and Metallic Coatings, 1.

Winkler Method.
The Determination of Traces of Dissolved Oxygen by the Winkler Method. M. C. Schwartz and W. B. Gurney, 796. Discussion, 813.
Wire.
The Vibrating Wire Method of Measuring Deformations. N. Davidenkoff, 847. Discussion, 861.
Wood.
Measuring the Combustibility of Fire-Retardant Wood. E. F. Hartman, A. S. Williams and R. C. Bastress, 754. Discussion, 791.
